PROFESSIONAL SUMMARY

Empathetic and ethically grounded M.Sc Clinical Psychology student (2025–2027) with hands-on counseling experience in a therapy and rehabilitation centre and supervised clinical internships in hospital and de-addiction settings. Trained in clinical case history taking, Mental Status Examination (MSE), patient observation and psychological report writing, with working knowledge of CBT, supportive counseling, psychoeducation and motivational interviewing. Brings a research foundation in quantitative methods and statistics, and is committed to evidence-based, patient-centred care while progressing toward licensure as a Clinical Psychologist.

PROFESSIONAL EXPERIENCE

Counselor

Until Oct 2026

Smile Home Therapy and Rehab Center · Coimbatore

- Provided individual and group counseling to residents of a therapy and rehabilitation centre.
- Offered supportive counseling and psychoeducation to help residents build coping and adjustment skills.
- Worked alongside the therapy and rehabilitation team to support residents' day-to-day well-being and progress.

CLINICAL INTERNSHIPS

Clinical Psychology Intern

30 Days

Aathma Hospital · Trichy

- Conducted detailed clinical case history interviews under the supervision of a licensed clinical psychologist.
- Performed Mental Status Examinations (MSE) for inpatients and documented findings accurately.
- Observed psychiatric assessments, diagnostic interviews and multidisciplinary ward rounds.
- Assisted in maintaining case records and preparing psychological reports.

Clinical Psychology Intern

15 Days

Navaneeth Mental Health Clinic & De-addiction Centre

- Gained direct exposure to substance use disorder assessment and rehabilitation planning.
- Participated in structured patient observation sessions and clinical case reviews.
- Supported therapeutic activities and psychoeducation sessions for patients and their families.

RESEARCH PROJECT

UG FINAL-YEAR DISSERTATION · B.SC PSYCHOLOGY

Impact of Mobile Phone Usage on Academic Performance and Sleep Quality

Designed and independently conducted a quantitative study examining the relationship between smartphone usage habits, academic outcomes and sleep health among college students. Handled questionnaire-based data collection, statistical analysis and interpretation, and presented data-driven findings — building research methodology skills that underpin evidence-based clinical practice.
